

Legal Translation Solutions

BIG Language Solutions has served law firms and in-house legal departments at some of the world's leading companies for nearly 50 years. Our specialist team provides accurate and cost-effective legal translation and interpretation services, on-time and on-budget, in even the most complex and challenging situations.

Translation

Whether related to cross-border litigation, M&A, regulatory affairs, or another complex area of law, legal translations present unique challenges. With stakes high, and time short, our solutions are designed to deliver accurate translations under tight deadlines and ready for court use.

- Certified Translation
- Draft Translation
- Neural Machine Translation

Interpretation

Multilingual legal matters are complex and often present legal interpretation challenges. With so much on the line, from multimillion-dollar verdicts to market-changing commercial decisions and business reputation, it's critical to work with a vendor that you can trust.

- Simultaneous Interpretation
- Consecutive Interpretation
- Over-the-phone Interpretation
- Video Remote Interpretation

Security First

BIG Language Solutions takes a 360-degree approach to the translation process; looking at the bigger picture to extend security beyond our internal platform so that all touchpoints – people, processes, and technology – are fully secure.

- **SOC 2 Type II** independent auditing of our internal and external security features, which provides detailed information about how our clients' data is stored, managed, and used.
- **ISO 27001**, routinely and systematically evaluate security risks, threats, and vulnerabilities, including network, malware, cloud, endpoint, and application security, as well as firewalls, data encryption, and secure messaging.
- **HITRUST CSF**, demonstrates an organization's Translation Management Software environment has met key regulations and industry-defined requirements and is appropriately managing risk.
- **ISO 9001**, which sets criteria for quality management systems based on customer focus, process, management approach, and the goal of continual improvement.
- **ISO 17100**, the international standard for translation management systems and provides the framework for high-quality translations, including processes, training, people management, and use of technology.
